### **Book Systems Releases New Circulation Mobile Apps**

July 7, 2014 -- Book Systems, Inc., an innovative leader in providing library automation and asset tracking solutions, releases new mobile apps designed for their Atrium Integrated Library and Booktracks Asset Management Systems.

Atrium Mobile Interface (AMI) provides librarians and library staff the ability to continue circulating items even if they are away from the circulation desk. The app allows users to perform basic transactions, including checking in items found in the hallway or left in the library, checking out items to patrons, and looking up the status of students and items. AMI is available for the iPhone® on the App Store<sup>SM</sup>.

Mobile Asset Tracking (MAT) is an application for iPhone devices and is also available on the App Store. MAT allows Booktracks users to circulate items on the go, distribute and collect textbooks and equipment, and also look up the status of patrons and items.

These two new apps join the "Atrium on the Go" app that was released in 2012. Atrium on the Go allows patrons to search a library's catalog from their favorite mobile device.

Additional information is available at <http://booksys.com/mobile-apps>

#### **About Book Systems, Inc.:**

Book Systems provides state of the art library automation and asset management software to libraries and schools of all sizes. The company's core values have led them to develop and deliver stress-free "cloud computing" technology, customer-driven features, and hands down, the best support in the industry. Book Systems is a privately-owned company with its corporate headquarters located in Huntsville, Alabama.
