

From hardware failure to hurricanes, disasters never strike at a good time. Is your anti-virus software up-to-date? Are viruses undetected? We can protect against the havoc that any disaster could wreak on your system, and have you up and running again in no time. Subscribe and use Book Systems' Remote Backup Service (RBS) to recover your Atrium and Booktracks database after disaster occurs.

RBS is an exclusive service for Atrium and Booktracks customers. As a subscriber, you receive immediate benefits of security and peace of mind. Protect your investment by implementing a disaster recovery plan using RBS to store your database files off-site.

How RBS Works

Your database files are securely uploaded to a server at Book Systems. Once we receive your files, they are scanned and verified. If corrupt data or a virus is found, we notify you immediately. Necessary steps will be taken to remove virus(es) and/or repair the damaged data. Should you need help with data that is overwritten, damaged, or is missing — simply contact our Technical Support for aid in restoring your backup.

Safe Keeping
We provide secure off-site storage of back-up data.

Protection and Repair
Virus scanning and basic data repair is done to insure the security of your data.

Always Accessible
Temporary ASP service is available to keep your system accessible during any emergencies.

Frequent Back-ups
Full back-ups are performed nightly with a 7 day storage rate.

Toll-Free Phone Support
Call us Monday through Friday between 7 am - 7 pm CST.

An actual customer photo of a hurricane-ravaged library. RBS to the rescue!
