Booktracks®
Asset and Textbook Management**Accountability for your most valuable assets.**

In today's world, keeping track of textbooks, eReaders, tablets, laptops, and other costly assets is critical to controlling your budget. With Booktracks, you get an easy-to-use yet powerful 100% Web-based program with textbook AND asset tracking capabilities that will save you time and a significant amount of dollars.

Booktracks meets the challenge of managing your textbooks and other assets by readily providing you the tools and information necessary, so you'll know exactly what you have, where it is located, and who's responsible for it. Whether you are an administrator, an IT professional, or a building level manager, Booktracks makes managing your assets easy and efficient, and keeps everyone accountable.

Booktracks is a highly configurable, asset management system that can be adapted to meet the needs of any size district or institution.

Use Booktracks to easily track:

- Textbooks
- Hardware
- Fixed Assets
- Mobile Devices

**HOSTING SOLUTIONS**

Our Booktracks ASP and Booktracks Express (SaaS) hosting options deliver stress-free, “cloud computing” technology, reduces IT costs, and provides “worry free” maintenance.

For us, it really is “all about you.”

Manage Your Assets with Ease and Efficiency

FOR ADMINISTRATORS

With Booktracks, administrators can gain instant access and knowledge regarding all of their assets across the entire district.

Course Data by Site

Based upon student enrollment, administrators can view course information for a school building, a group of schools, or all schools at once to ensure that each student has the required textbooks and assets needed for their classes.

Entity Responsible

Administrators have the flexibility to create entities that provide additional means for tracking.

Forecast Expenditures

Expense reports available in Booktracks allow business administrators to make critical financial decisions for budgeting and forecasting expenditures.

Inter-School Building Loan

Facilitates and streamlines the process of transferring textbooks and equipment from a central distribution center to individual locations, or transferring items between buildings.

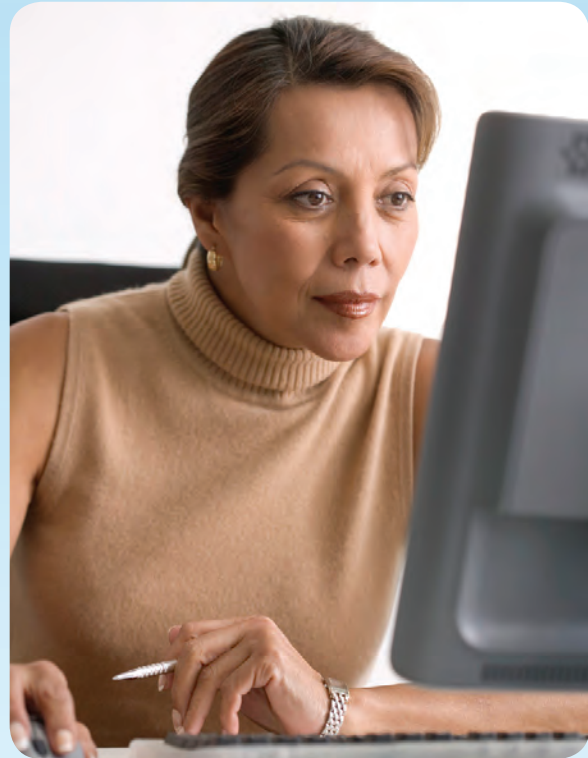

FOR IT PROFESSIONALS

Reliable Technology

Using “cloud-based” technology and a powerful backend SQL database, Booktracks provides robust performance and secure access from any computer or mobile device, using a browser. No java client application or other client software required, thus reducing IT resources.

Warranty & Condition Tracking

Robust reporting and tracking provides IT Professionals instant access to equipment condition, warranty expiration, and items that are in need of repair.

FOR BUILDING LEVEL STAFF

Distribution & Collection

Booktracks offers a variety of methods and features that simplify the distribution and collection process of your textbooks and/or equipment.

Electronic Notifications

Increase collection of fines/fees for lost or damaged items using built-in form letters that can be customized and printed or emailed, reducing your expenses.

Inventory Management

Supports the ability to run multiple inventories concurrently, streamlining your physical inventory process. Perform inventory using a supported scanner from any computer, laptop, or portable device.

Hardware / Software Requirements

Refer to the Booktracks Technical FAQ's and Booktracks Hardware Requirements for specifications.
