Library Automation Made Easy...
Award-winning, affordable library automation software

Concourse is Book Systems' proven library management software for the Windows environment. Librarians and Media Specialists have contributed ideas making it feature rich. Our programmers take those ideas and continue to make Concourse easy to use. Concourse allows for easy navigation using an icon flowchart on the Navigator screen, menu options, or keyboard shortcuts to perform functions.

Any Windows-based library automation program that you choose should be:

◊ Easy to use with context-sensitive help
◊ Intuitive of what you expect it to do
◊ Meet or exceed your needs
◊ Well supported

Concourse meets these criteria and offers these great features:

◊ Cataloging   ◊ Inventory
◊ Authority   ◊ Custom Reports
◊ Circulation   ◊ Self Checkout
◊ Searching / OPAC ◊ Patron Labels

Media & Methods AWARDS PORTFOLIO WINNER
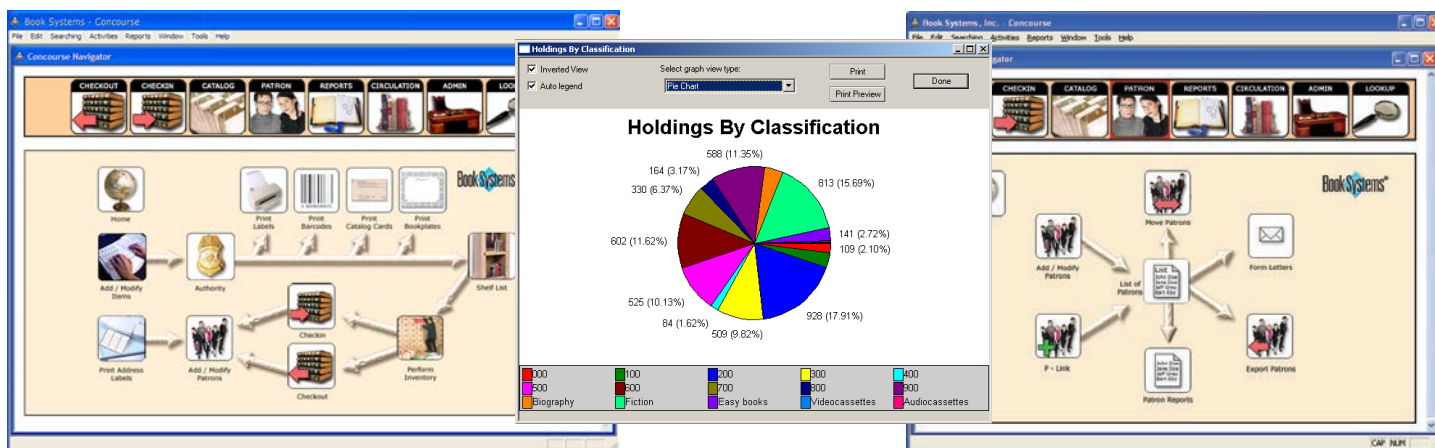

Microsoft Certified Solution Provider

"We have been using our Concourse software for a little over a year and I wanted to let you know how very satisfied we are with the program and how very easily my staff members learned to use it. It is very intuitive and quite comprehensive... Our technician commented a few days ago that this is a surprisingly trouble free program... All the contacts we have had with you and your staff were very positive."

Easy Navigation

Concourse uses flowcharts and toolbars to provide easy and instant access to every library task. Based on input from our customers, we developed Concourse so that you can operate your library efficiently.

Secure Access and Control

Limit access to specific functions of Concourse by creating individual worker logins and assigning permissions. Use Concourse OPAC to provide patrons search-only access of your collection.

Customizable Reports

Easily transform standard library reports with powerful filters, global editing, drill-down capabilities, and more. Concourse provides versatility and built-in report graphing without having to export data to other programs.

System Requirements

- 2 GB RAM for Windows 7, 8, and 10
- Intel Pentium 4 Processor or Higher
- 160MB available for program and electronic Guides
- An additional 2MB for every 1,000 bibliographic records
- SVGA Monitor 1024 x 786 or greater and at least 16-bit color

Concourse Add-Ons

◊ **Authority** - Authority control module

◊ **BarcodeMaster** - Barcode printing module

◊ **eZcat** - USMARC download utility

◊ **P-Link** - Patron data import utility

◊ **WebOPAC** - Internet access to library's catalog
