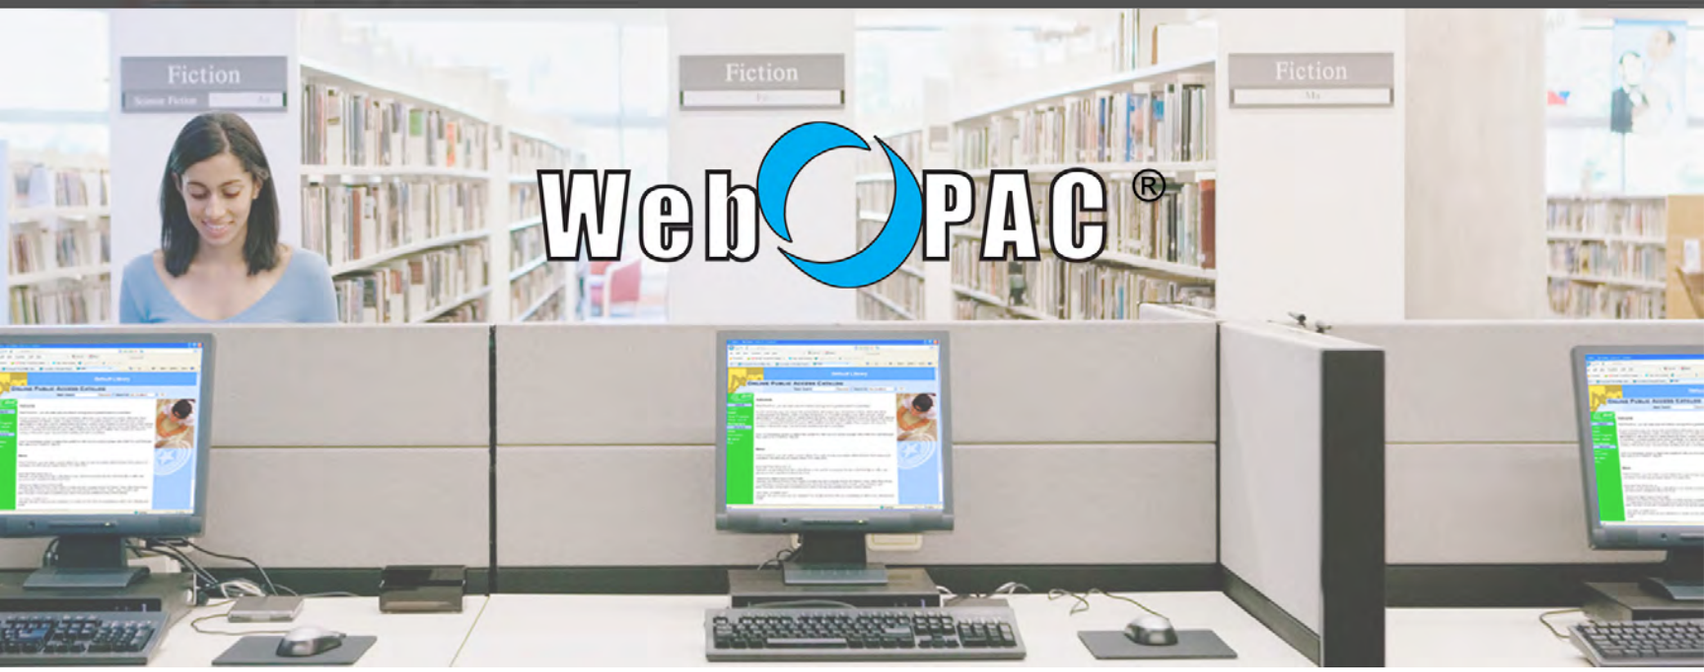
Book Systems®



Information has never been made more accessible than with the development of the internet. Now more than ever, patrons come to expect having the same accessibility to their local library's collection. Using Book Systems' innovative web server technology , WebOPAC provides your library with the ability to utilize the power of the internet and allows patrons 24/7 access to the library's catalog.

Using a standard web browser from home, a favorite coffee shop, or anywhere with internet connectivity, patrons can take advantage of WebOPAC's powerful search options to view the library's collection virtually anywhere, anytime.

WebOPAC supports Easy Word (keyword), Title, Author, Subject, ISBN, Visual, and Study Program (Accelerated Reader, Reading Counts!, etc.) searches. Even more advanced searches are available with WebOPAC's Combo and Expert (Boolean logic) searches.

Add Book Systems' OPAC Snapshot subscription service to WebOPAC, so your patrons can enjoy viewing detailed, enriched content information within search results. Inspire your patrons to turn to your library for all their information needs.

Media & Methods AWARDS PORTFOLIO WINNER

Microsoft Certified Solution Provider

"Having used Concourse and eZcat for several years, the next logical step was to provide our catalog to our patrons at home through the Internet. WebOPAC is the best product I've seen available for the money, especially for libraries with tight budgets. It's user-friendly... and easy to navigate. From an administrator's viewpoint, it's easy to configure and maintain. I highly recommend this product to any library looking to provide even better service to their patrons."

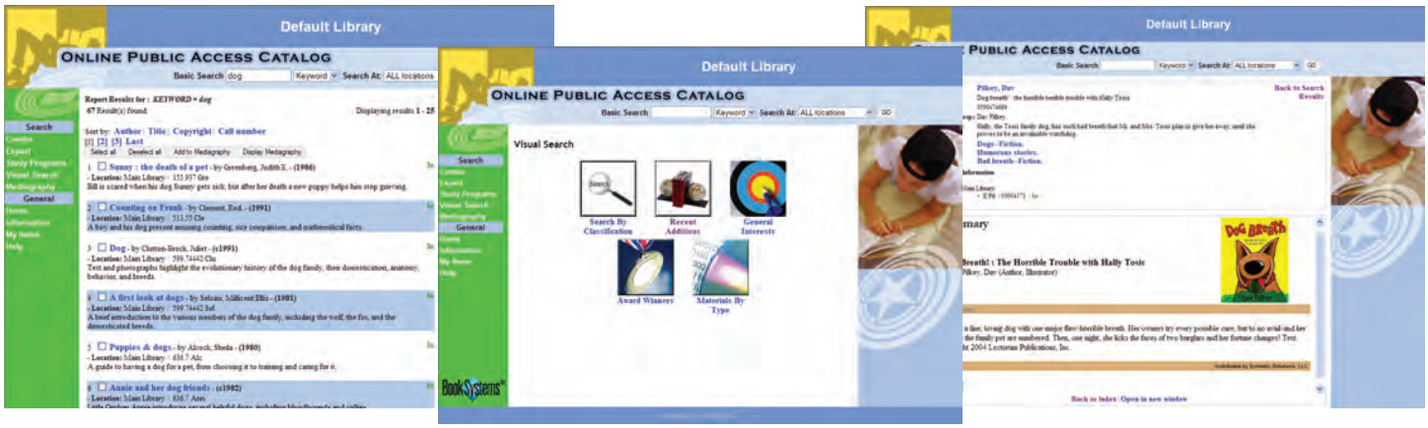
Book Systems®

# WebOPAC®



## WebOPAC Features

WebOPAC installs easily on any Windows-based computer and is immediately accessible for your patrons to begin searching your collection. Use the preconfigured web page style, or customize your own design to create a custom look for your library!

## Searching

Search the library catalog with ease and convenience. There are a variety of powerful search methods available, including Title, Author, Subject, and ISBN. WebOPAC also supports Expert, Combo, Study Program (Accelerated Reader, Reading Counts!, etc.), and Visual Searches.

## Patron Access

Patrons access your library collection via the internet from a variety of platforms; i.e., Macintosh, Windows, Linux, or UNIX. They can search at their convenience from the classroom, home, office, or any other location where there is internet access. Using the patron ID and PIN, patrons can also check the status of their account, reserve items, build and print their own mediagraphy, and more.

## WebOPAC System Requirements

**Platform:** Windows 7 or Higher
**Processor:** Intel Pentium 4 Processor or Higher
**Memory:** 2 GB RAM for Windows 7, 8, and 10
**Monitor:** 1024 x 768
**Disk Space:** 10MB
**Network:** Internet connection, Static IP, and Concourse network version required
