

## Training

### Our #1 Goal is Ensuring Your Success

We offer a variety of training options to meet your needs. Our trainers are degreed librarians who are former customers that used Atrium to manage their libraries. They provide innovative learning content that helps you work effectively and teaches you how to take advantage of Atrium's functionality for the most efficient results.

#### On-Site Training

On-site training at your library by one of our Certified MLS Degreed Trainers will make the most of your software purchase and help you and your staff work effectively from the start. We highly recommend at least (2) days of initial on-site instructor-led training for staff (directors and assistants) to satisfactorily accomplish training for all product features. Additional training days may be required, depending on add-on modules and services purchased.

#### Online Training

Our interactive online training sessions deliver real-time, cost-effective training designed for libraries with limited staff, follow-on training, or training for new staff members. All you need is a computer with a high-speed Internet connection and a telephone. *(Limited to 5 participants per session purchased)*

#### Refresher Training

Our focused follow-up training provides uniquely designed sessions to boost your staff's knowledge. Participants can acquire detailed information about product features or learn about the latest updates.
